

Kindergarten's Ocean

May

In our classroom...

After spring break, students have jumped right back in! Students are working on reading even more challenging texts. In Math, they are focusing on measurement and continuing to build their understanding of numbers larger than ten.

This month, in Social Studies students will be focusing on different cultures! They will explore their own culture and the cultures of their classmates. In Science, students will continue to learn about animals and how they adapt to their environment. They will also discuss the impact animals and people have on their surroundings and how to protect the Earth.

Exciting Happenings

1. **Kindergarten has caterpillars.**
Students will get to watch the process of metamorphosis as the caterpillars change into a chrysalis and then a butterfly. At the end of this project, we will release the butterflies outside.
2. **Field Trip to the Discovery Center**
All of Primary Academy will visit the Susan G. Gorman Conservation Discovery Center in the morning on May 22nd and 23rd.

Dates to Remember:

- May 16/17th-** STAR Testing
May 22 – Mrs. Krueger Field Trip
May 23rd- Ms. Oxley Field Trip
May 24th- ½ day of school
May 27th- No School(Memorial Day)
May 30th- ½ day (Last School Day)

Thank you all for the support and hard work this year!
We have loved working with your children and are so excited to see them move on into First Grade!

~Ms. Oxley and Mrs. Krueger
