

Kindergarten's Ocean

November

In the Classroom

In Math, students are focusing on solving problems with numbers 0-10. They are using a ten frame to make these numbers and also to answer story problems.

In Science, students have been working on weather and the seasons. We will continue emphasizing this throughout the year.

In Social Studies, students are working on identifying our country and the symbols that represent our country. They are also practicing the Pledge of Allegiance.

In Reading, students are improving their reading skills during reading groups and their independent reading time. Students are progressing in their alphabet knowledge and sight word identification. Students are also working on using the alphabet to help them sound out and spell words during their writing time.

Thank you for making it out to your student's Parent Conference, so that you could see their progress and all their hard work.
